Safe Harbor

This presentation contains “forward-looking statements” within the meaning of the federal securities laws, including Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are based on information available to the Company as of the date hereof, as well as the Company’s current expectations, assumptions, estimates and projections that involve risks and uncertainties. In this context, forward-looking statements often address expected future business, financial performance and financial condition, and often contain words such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “could,” “seek,” “see,” “will,” “may,” “would,” “might,” “potentially,” “estimate,” “continue,” “target,” similar expressions or the negatives of these words or other comparable terminology that convey uncertainty of future events or outcomes. All forward-looking statements by their nature address matters that involve risks and uncertainties, many of which are beyond the Company’s control, and are not guarantees of future results.

Forward-looking statements are subject to risks, uncertainties and assumptions that could cause actual results to differ materially from those expressed in any forward-looking statements. Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in such statements and, therefore, you should not place undue reliance on any such statements and caution must be exercised in relying on forward-looking statements. Important risk factors that may cause such a difference include, but are not limited to: the Company’s ability to implement its business strategy; the Company’s ability to enter into new and renewal license agreements with customers on favorable terms; the Company’s ability to retain and hire key personnel; uncertainty as to the long-term value of the Company’s common stock; legislative, regulatory and economic developments affecting the Company’s business; general economic and market developments and conditions; the Company’s ability to grow and expand its patent portfolios; changes in technology and development of new technology in the industries in which in which the Company operates; the evolving legal, regulatory and tax regimes under which the Company operates; unforeseen liabilities and expenses; risks associated with the Company’s indebtedness; unpredictability and severity of catastrophic events, including, but not limited to, acts of terrorism or outbreak of war or hostilities, natural disasters and global health pandemics, each of which may have an adverse impact on the Company’s business, results of operations, and financial condition. These risks, as well as other risks associated with the Company’s business, are more fully discussed in the Company’s filings with the U.S. Securities and Exchange Commission (“SEC”), including the Company’s Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. While the list of factors presented here is, and the list of factors presented in the Company’s filings with the SEC are, considered representative, no such list should be considered to be a complete statement of all potential risks and uncertainties. Unlisted factors may present significant additional obstacles to the realization of forward-looking statements.

Causes of material differences in results as compared with those anticipated in the forward-looking statements could include, among other things, business disruption, operational problems, failure to complete licensing arrangements on anticipated terms and timeline, failure to prevail in litigation we may bring against third parties, financial loss, legal liability to third parties and similar risks, and failure to attract or retain employees, any of which could have a material adverse effect on the Company’s consolidated financial condition, results of operations, liquidity or trading price of common stock. The Company does not assume any obligation to publicly provide revisions or updates to any forward-looking statements, whether as a result of new information, future developments or otherwise, should circumstances change, except as otherwise required by securities and other applicable laws.

adeia™

[AH – dee – uh]

Adeia turns ideas into innovations. Our name may be new, but our roots run deep with decades of continued innovation

We invent, develop and license revolutionary innovations in media and semiconductors, including AI enabling technologies

NASDAQ

Ticker ADEA

~$10.9B cumulative licensing revenue

$443M 2025 revenue

14,250+ patent assets

125+ current customers

35+ years of pioneering innovation and licensing success

Headquarters:
San Jose, CA

Our leading **media** patent portfolio powers the foundational technologies of digital experiences

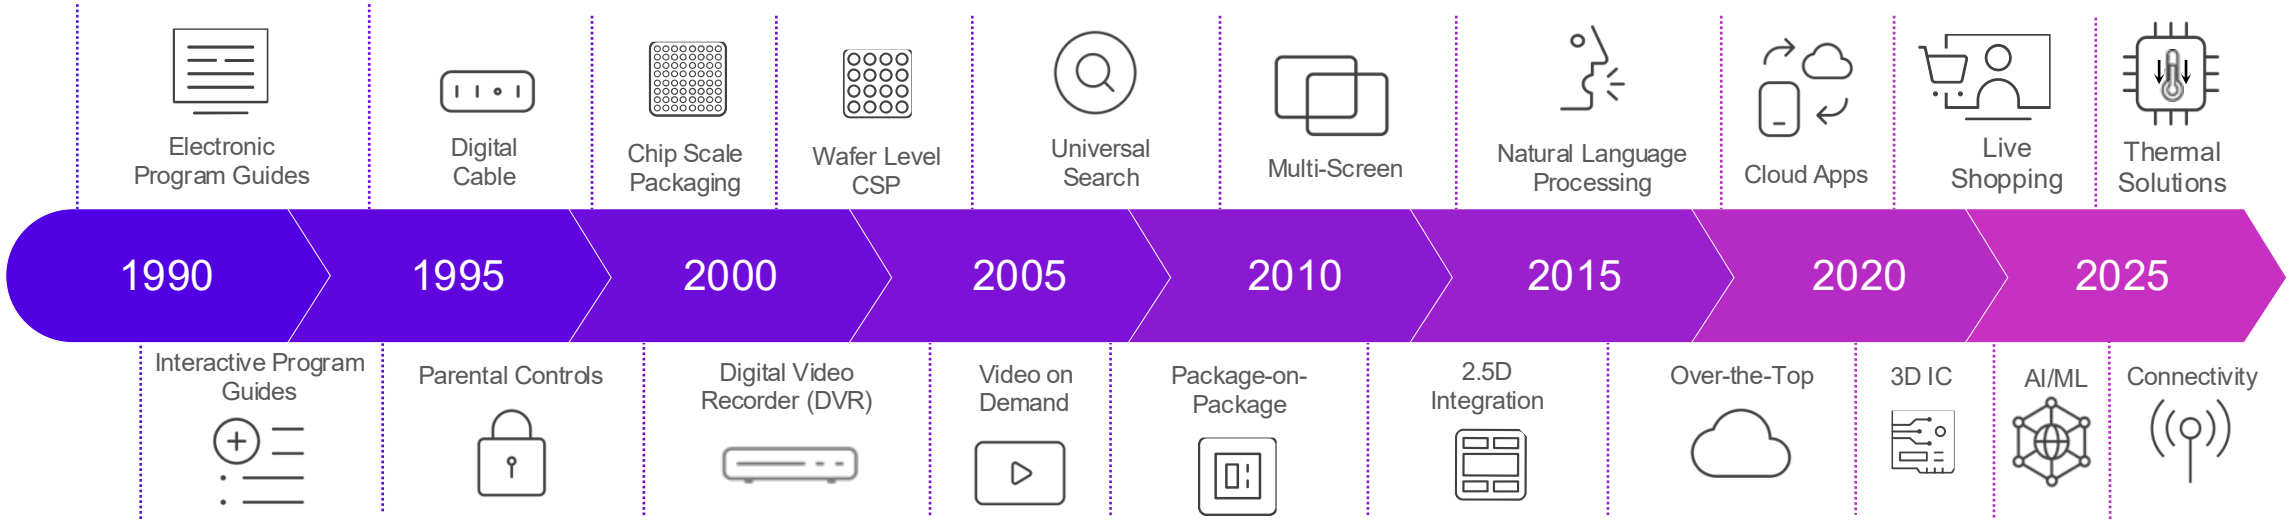

Our leading **semiconductor** patent portfolio is focused on hybrid bonding which powers the AI infrastructure and high-performance computing

Measures of Success

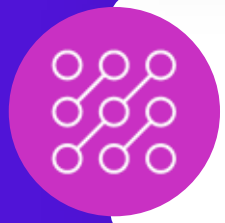

Increase Long-Term Revenue
Continue to execute renewals and new customer agreements that will increase our annual revenue over the long-term

IP Portfolio Growth
Continue to grow patent portfolio through focused organic R&D and strategic inorganic investments

Balanced Capital Allocation Approach
Continue to pay down our term loan, return capital to shareholders through stock repurchases and dividends, and make strategic tuck-in acquisitions

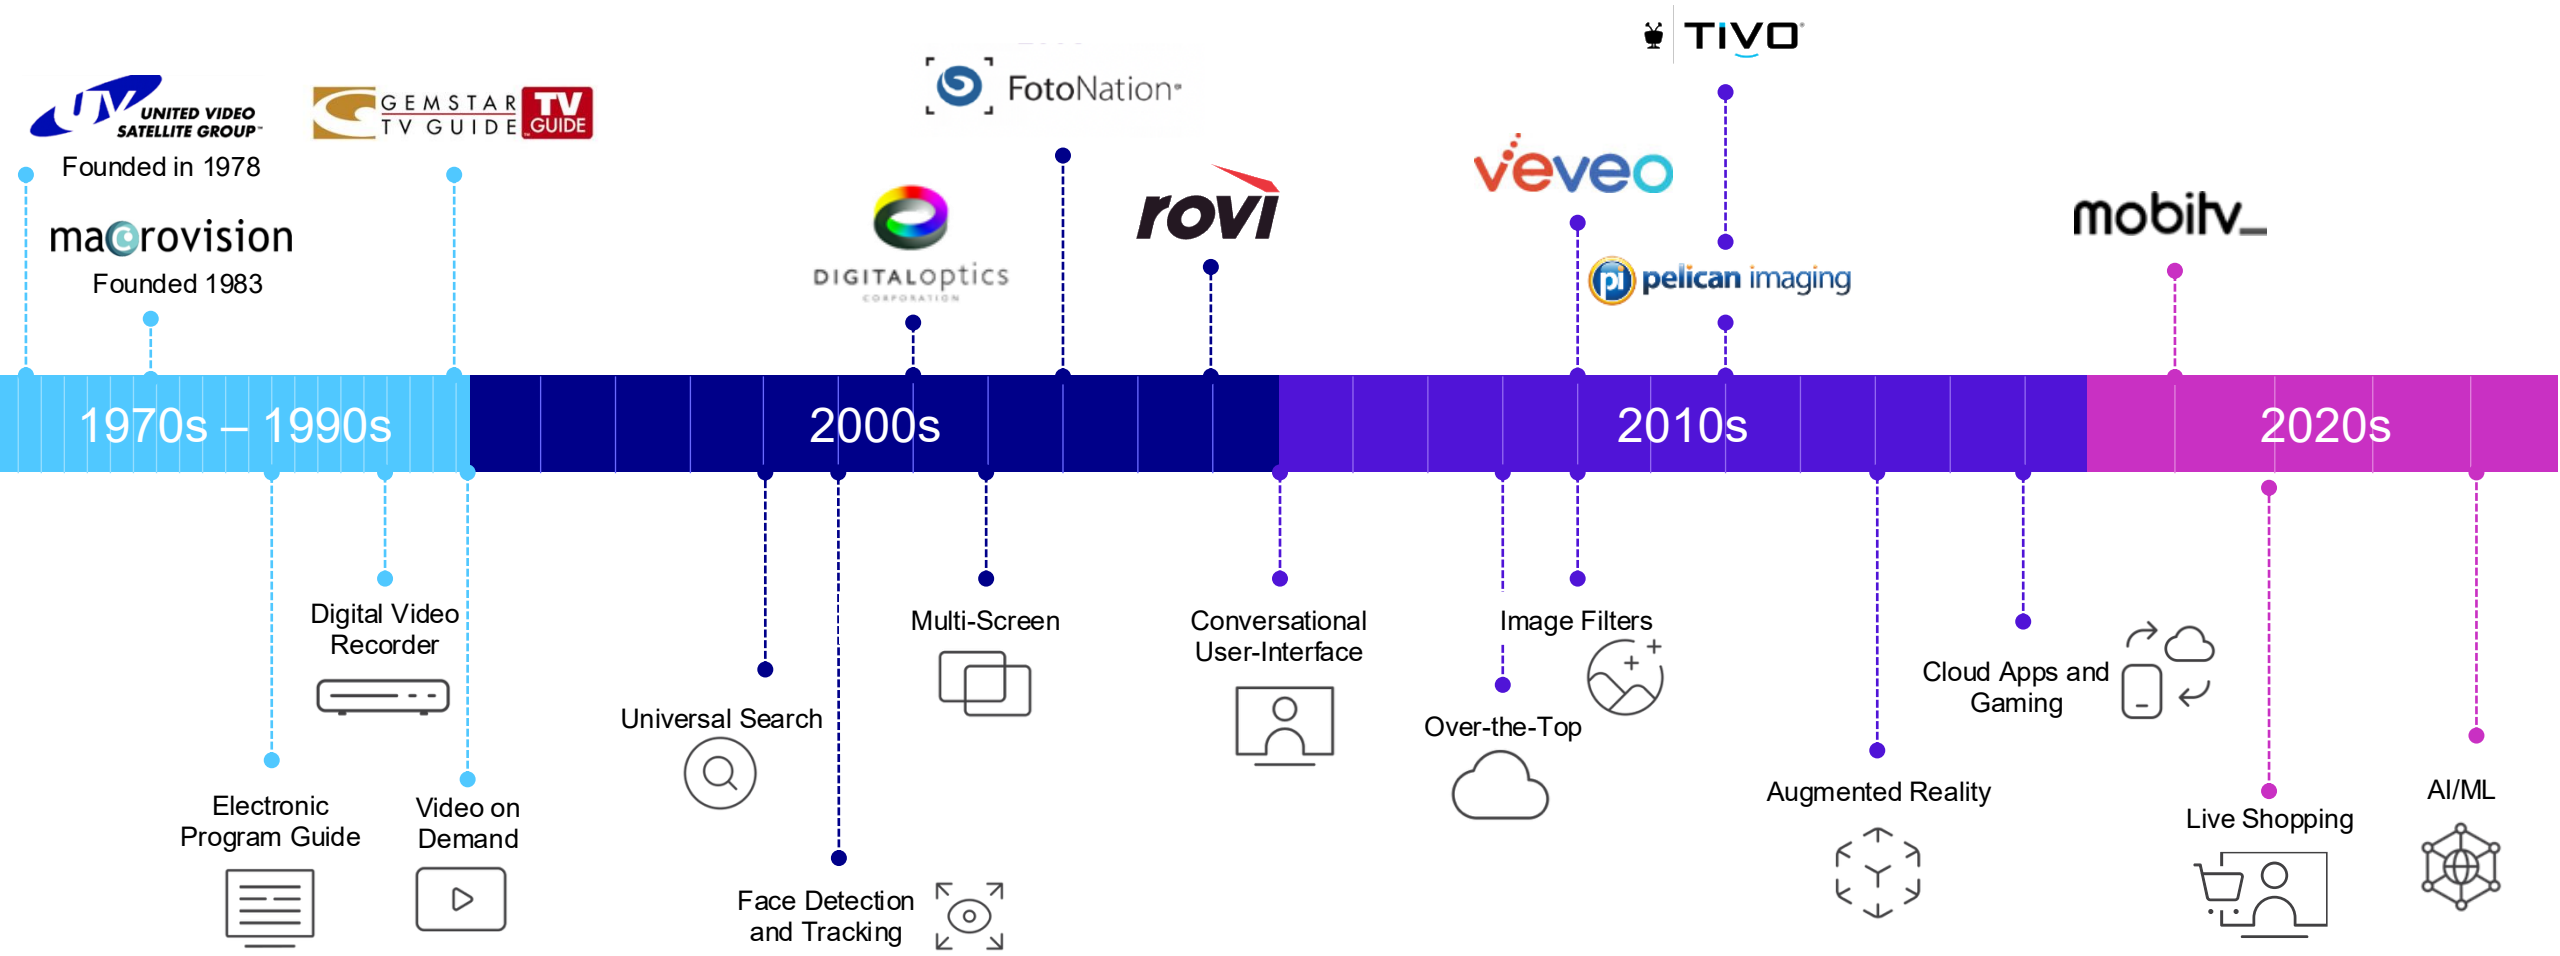

Grow Pipeline of Opportunities
Continue to invest in key areas that will grow our pipeline of future opportunities in OTT, semiconductors, and adjacent media markets

Financial Overview

adeia

Value Proposition

Foundation Driven by Strong Portfolios and Technology Offerings

14,250+ patent assets provide both depth and breadth to our licensing base

Long and impressive history of successfully monetizing our portfolios

Ongoing Innovation and Capitalization of Market Trends Drive Growth

Ongoing innovations drive growth in targeted markets including AI enabling technologies

Proliferation of video is expanding rapidly

Semiconductor industry is challenged to keep up with Moore's law

Focused Capital Allocation to Maximize Shareholder Value

Focused investments in innovation across media and semiconductors

Expand IP portfolios through tuck-in acquisitions

Focused deployment of capital with a balanced approach of deleveraging our balance sheet and returning capital to shareholders

© 2026 Adeia | All rights reserved.

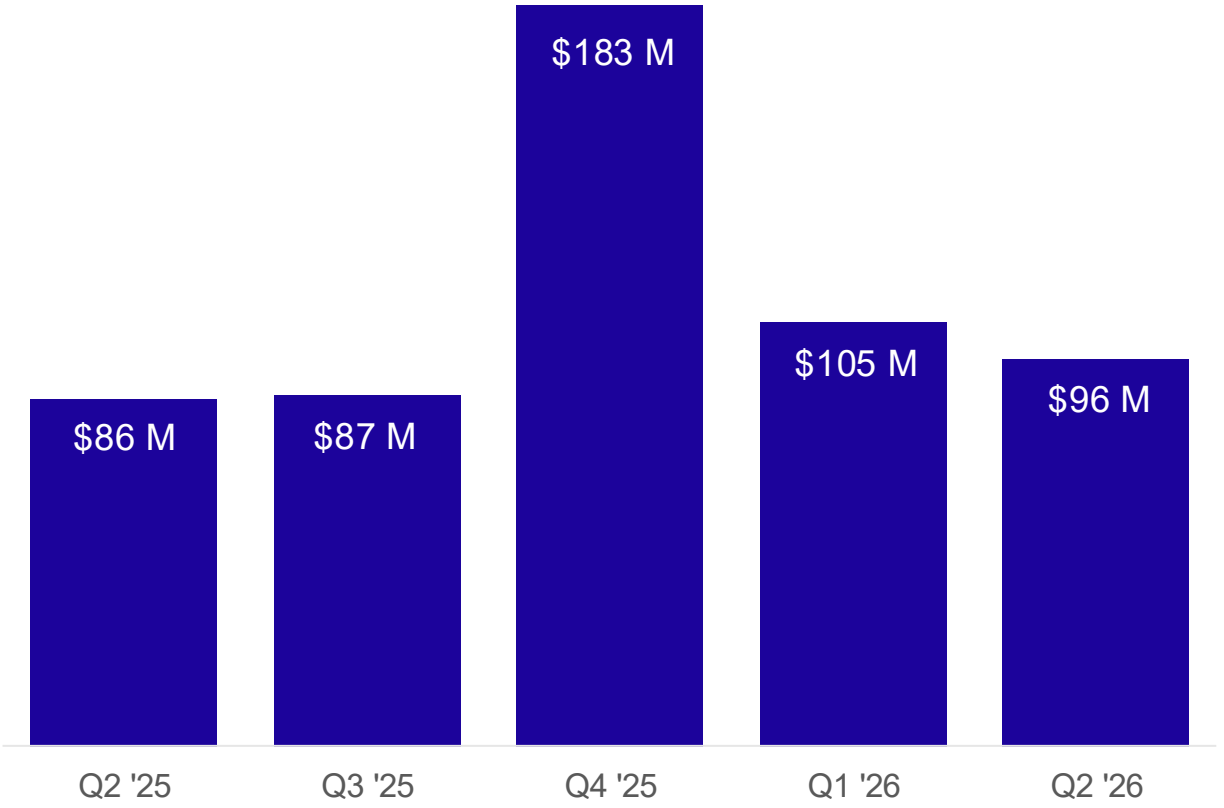

Revenue Performance

Our revenue recognition profile is captured in the following categories:

- Variable royalty licenses for Media and Semiconductor
- Fixed-fee Media IP licensing

Our licenses are multi-year agreements with an average license term of **5** years

The duration of the license terms provide a solid recurring revenue stream

© 2026 Adeia | All rights reserved.

Investment Priorities Focused on Top-Line Growth

Long-Term Outlook

Annual revenue expected to reach **$600 million**

Overall Non-GAAP operating expenses expected to increase **~5-8%**

- Growth primarily driven by R&D; planning for **8-10%** annual increase in innovation-focused investment
- Modest growth anticipated for SG&A
- Litigation remains highly variable in relation to current activities

© 2026 Adeia | All rights reserved.

Balanced Capital Allocation Strategy

Strategic Capital Allocation Approach Drives Long-Term Revenue Growth and Shareholder Value

Organic investment

Expand IP portfolio through continued innovation

Strengthen our balance sheet

Pay down our term loan

Return capital to shareholders

Continue share repurchases and dividend payments

Tuck-in acquisitions

Pursue opportunities that are complementary to and advance our core strategy

© 2026 Adeia | All rights reserved.

adeia™

Financial Results & Outlook

adeia

Q2 2026 Business Highlights

Revenue of $96.1 million, cash from operations of $54.6 million and an adjusted EBITDA margin of 58.7%

Signed 6 license agreements across OTT, e-commerce, consumer electronics and Pay-TV

Added a record 12 new customers in the quarter

Non-Pay-TV recurring revenue grew 54.0% year-over-year in the quarter, continuing a multi-quarter trend as our non-Pay-TV pipeline remains robust and continues to grow

© 2026 Adeia | All rights reserved.

Recent Deal Momentum

Signed a multi-year renewal with Google, which includes YouTube TV, one of the largest Pay-TV providers, for access to our media portfolio

Signed a multi-year license agreement with RPX, a leading provider of patent risk management solutions, encompassing 10 new e-commerce customers, for access to our media portfolio

Signed new multi-year license agreement with L'Oréal, a leading cosmetics and personal care company, for access to our media portfolio

Signed a new multi-year license agreement with a domestic OTT provider, and license renewals with a leading European Pay-TV provider and a Japanese consumer electronics manufacturer, all for access to our media portfolio

© 2026 Adeia | All rights reserved.

Measures of Success

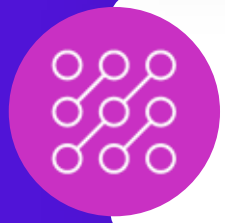

Increase Long-Term Revenue
Continue to execute renewals and new customer agreements that will increase our annual revenue over the long-term

IP Portfolio Growth
Continue to grow patent portfolio through focused organic R&D and strategic inorganic investments

Balanced Capital Allocation Approach
Continue to pay down our term loan, return capital to shareholders through stock repurchases and dividends, and make strategic tuck-in acquisitions

Grow Pipeline of Opportunities
Continue to invest in key areas that will grow our pipeline of future opportunities in OTT, semiconductors, and adjacent media markets

Non-GAAP Financial Measures

In addition to disclosing financial results calculated in accordance with U.S. Generally Accepted Accounting Principles (GAAP), the Company's presentation contains non-GAAP financial measures adjusted, where applicable, for either one-time or ongoing non-cash acquired intangibles amortization charges, costs related to actual or planned business combinations including transaction fees, integration costs, severance, facility closures, and retention bonuses, separation costs, all forms of stock-based compensation, leadership transition costs, loss on debt extinguishment, expensed debt refinancing costs, impairment of intangible assets, impact of certain foreign currency adjustments, discontinued operations and related tax effects. In addition, adjusted EBITDA adjusts for recurring charges of interest expense, income taxes, depreciation and amortization. Management believes that the non-GAAP measures used in this presentation provide investors with important perspectives on the Company's ongoing business and financial performance and are helpful to provide investors with an understanding of our core operating results reflecting our normal business operations. The non-GAAP financial measures disclosed by the Company should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP. Our use of non-GAAP financial measures has certain limitations in that the non-GAAP financial measures we use may not be directly comparable to those reported by other companies. For example, the terms used in this presentation, such as EBITDA margin, which is defined as EBITDA as a percentage of revenue, adjusted EBITDA, adjusted EBITDA margin, non-GAAP operating expenses, non-GAAP net income and non-GAAP diluted earnings per share (EPS) do not have a standardized meaning. Other companies may use the same or similarly named measures, but exclude different items, which may not provide investors with a comparable view of our performance in relation to other companies. We seek to compensate for the limitation of our non-GAAP presentation by providing a detailed reconciliation of the non-GAAP financial measures to the most directly comparable GAAP measures in the tables attached hereto. Investors are encouraged to review the related GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures. All financial data is presented on a GAAP basis except where the Company indicates its presentation is on a non-GAAP basis.
